## PROFILE

Over the years I have gained extensive experience in the IT services and consultancy industry where I have worked in both technical and managerial positions.

I have been a software consultant, project manager, team manager, agile coach, SCRUM master, product owner and advisor.

Getting along well with people from all walks of life and thinking along easily with both management and technical staff due to my technical computer science knowledge and business administration training. I am specialized in innovative agile projects where problems are still fuzzy and creative solutions yet have to be found.
